

Examples of course-specific questions

The following examples of previous course-specific questions are from the period 2014 to 2016. The questions are updated to fit the current questionnaire's degree scale (To a very high degree; To a high degree; To some degree; To a lesser degree; Not at all; Don't know/not relevant).

Close-ended questions

Questions about teaching elements

- To what degree do you experience, that the three tests in Absalon are beneficial?
- To what degree do you experience, that the course's online learning resources and activities inspire you to prepare before class?
- To what degree do you experience, that the course's excursions to private companies and organisations help you apply theory from the course in practice?

Questions about group and project work

- To what degree do you experience, that the scheduled group work has prepared you for the work with the project report?
- To what degree do you experience, that you have benefited from the group-based project report?
- To what degree do you experience, that you have benefited from the group work on practical Animal Livestock in total?

Questions about clinical training

- To what degree do you experience, that the location for the clinical training has been sufficiently informed prior to the stay (e.g. meeting place and time, contact between the location and you, requirements and rules and/or purposes)?
- To what degree do you experience, that the activities during the clinical training support the development of your academic competences?
- To what degree do you experience, that the clinical training contributes to the academic progression?

Open-ended questions

Questions about teaching elements

- What aspects of the practical exercises can be improved?
- What is your experience of the learning in this type of course, where it is all self-studying and handing in papers?
- The number of chemistry lectures and theoretical exercises has increased this year to reduce the pressure of the review. What is your experience?

Questions about group or project work

- What aspects of the teaching related to the project work well?
- Do you have any comments on the outcome of the work on the project assignment?

- What do you think about the prose assignments in forensic medicine, which were to be answered in groups of ten students?

Questions about clinical Training

- Do you have any comments on the information prior to your clinical training? (E.g. in relation to the information the location of the clinical training or you received)
- Do you have any comments on the academic progression in connection with your clinical training?

Other questions:

- Please indicate why you chose this elective course
- Would you recommend this course to your fellow students, why/why not?
- A change in the chemistry part this year was self-test 1-4. What did you get out of them?
