

2025(1S) Curriculum for the Master Programme in Companion Animal Clinical Science at the Faculty of Health and Medical Sciences, University of Copenhagen

This revised curriculum comes into force on 1 September 2025 and shall apply in relation to all students admitted to the programme.

The curriculum was approved by the Dean in June 2013 with changes approved on 1 February 2014, 12 March 2019, 10 March 2020, March 2021, March 2022, March 2023, March 2024 and March 2025.

This subject-specific curriculum, the course descriptions at <https://kurser.ku.dk/> and the general curriculum provisions together comprise the curriculum for the Master Programme in Companion Animal Clinical Science.

Part 1 Objectives and Competence Profile

§ 1 Objectives

The objective of the Master Programme in Companion Animal Clinical Science (Master i klinisk familiedyrvidenskab) is to give veterinarians with at least 2 years of practical professional experience from companion animal practice a scientifically based continuing education in applied and advanced veterinary methodology, para clinical skills and clinical decision making. The student will attain specialized knowledge, skills, and competences within an elective companion animal specialization.

1.2 Successful completion of the programme gives the right to one of the following titles, depending on the completed specialization track:

Master of Companion Animal Clinical Science (Internal Medicine) and the Danish title master i klinisk familiedyrvidenskab (Intern medicin)

Master of Companion Animal Clinical Science (Surgery) and the Danish title master i klinisk familiedyrvidenskab (Kirurgi)

Master of Companion Animal Clinical Science (Cardiology) and the Danish title master i klinisk familiedyrvidenskab (Kardiologi)

Master of Companion Animal Clinical Science (Neurology) and the Danish title master i klinisk familiedyrvidenskab (Neurologi)

Master of Companion Animal Clinical Science (Oncology) and the Danish title master i klinisk familiedyrvidenskab (Onkologi)

Master of Companion Animal Clinical Science (Dermatology) and the Danish title master i klinisk familiedyrvidenskab (Dermatologi)

Master of Companion Animal Clinical Science (Ophthalmology) and the Danish title master i klinisk familiedyrvidenskab (Oftalmologi)

Master of Companion Animal Clinical Science (Odontology) and the Danish title master i klinisk familiedyrvidenskab (Odontologi)

1.3 The degree is worth 60 ECTS credits.

1.4 The programme falls within the scope of the Study Board for the Professional Master's Programmes.

1.5 The programme falls within the scope of the corps of external examiners for veterinary medicine.

§ 2 Admission requirements

A maximum of 30 students can be admitted to the programme.

It is a requirement for admission that the applicant:

- holds a candidate degree in Veterinary Medicine/Doctor of Veterinary Medicine (DVM)
- Has at least two years of relevant work experience in Companion Animal Practice after having completed the qualifying course of study. Qualifying working experience is primarily experience as veterinary practitioner

2.2 Admission to a professional master's programme requires a mastery of English corresponding to level B English at Danish upper secondary level. Applicants must document proficiency in English as stated in the programme webpage.

2.3 The courses offered under the programme are offered as single courses. The same admission requirements apply to students taking single courses. If the number of applicants for a given course exceeds the number of seats, priority is given to students enrolled in the full master programme.

2.4 The admission committee may grant exemptions from the provisions of 2.1 by exceptional circumstances

§ 3 Competence profile

On completion of the programme, the graduate will be able to approach and address complex companion animal health and disease problems in a highly reflective and structured problem-oriented fashion based on analysis of collected data and information from the medical literature, resulting in clinical decision making and planning and execution of specialized diagnostic work up, procedures and therapeutic strategies at an advanced level. Furthermore, to communicate professional and specialization related topics and solutions to new issues to specialist and non-specialist colleagues, as well as to lay people. The graduate will be able to participate in cross disciplinary interaction, networks, and collaboration at a highly qualified level within the elected area of specialization. The graduate will have the foundation to continuously develop professionally within the area of specialization.

Knowledge:

The graduate will be able to:

- Define, identify, and discuss veterinary methodology and para clinical tools in systematized reflective clinical decision making in companion animal clinical practice specifically within the elected specialization
- Explain, reflect about, and demonstrate overview of complex clinical decision making, patient therapy and management at a specialized level
- List, classify, and demonstrate critical reflection on existing and new approaches to patient diagnosis, therapy, management, and client education in a specialty practice situation.

Skills:

Within the area of specialization the graduate will be able to:

- Apply the quantitative and qualitative methodologies and tools as well as master relevant skills.

- Interpret, assess, and reflect on collected patient data in order to identify/localize the cause of disease, make clinical decisions, arrive at a diagnosis, apply, and integrate evidence based scientific approaches to plan and administer further diagnostics, patient therapy and management
- Continuously seek out, reflect on, and apply new evidence-based methods and solution models
- Communicate and discuss academic issues and solution models with both peers and non-specialists at an advanced level and across disciplines within companion animal practice
- Communicate effectively in writing and pass on results to relevant parties

Competences:

The graduate will be able to:

- Evaluate and manage companion animal diseases within the chosen specialization, which may necessitate novel solutions and approaches identified from current medical literature or other resources.
- Work independently, take responsibility for, predict, prognosticate, and make decisions within the chosen specialization.
- Collaborate constructively within and between specialists/professionals and lay persons involved in companion animal patient management.
- Make ethical considerations regarding diagnostic methods and therapies and place these into perspective.
- Independently evaluate and structure own learning processes and continuously obtain new knowledge at a specialty level within the chosen specialization

Part 2 Modules, instruction, maximum duration of study

§ 4 Modules

The modular structure of the programme is designed to provide students with overall academic qualifications within a prescribed timeframe, which is defined in terms of ECTS points. All courses in the programme are subject to a modular structure.

§ 5 Maximum duration of study

Students must complete the programme no more than six years following commencement 5.2. The Study Board may grant exemptions from the six-year time limit under extraordinary circumstances.

Part 3 Study and exam activities

§ 6 Study and exam activities

Outline of compulsory courses:

Course title and code	Exam Title and Code for Ongoing Test	ECTS	Exam Title and Code for Subject Element Exam	ECTS
<u>Veterinary Methodology and Paraclinical Skills</u> SCAM13001U	Veterinary Methodology and Paraclinical Skills SCAM13001E	7.5		

<u>Companion Animal Internal Medicine and Speciality Cases, Systematic Diagnostic Decision Making</u> SCAM25017U	Companion Animal Internal Medicine and Speciality Cases, Systematic Diagnostic Decision Making SCAM25017E	1	Companion Animal Internal Medicine and Speciality Cases, Systematic Diagnostic Decision Making SCAM25018E	6.5
<u>Companion Animal Surgery – Good Surgical Practice</u> SCAM25019U	Companion Animal Surgery – Good Surgical Practise SCAM25019E	2	Companion Animal Surgery – Good Surgical Practise SCAM25020E	5.5
<u>Dedicated Companion Animal Clinical Practice</u> SCAM13004U	Dedicated Companion Animal Clinical Practice SCAM13004E	7.5		

Outline of elective courses:

Specialization Track title	Course title and code	Exam Title and Code for Ongoing Test	EC TS	Exam Title and Code for Subject Element Exam	ECT S
Companion Animal Internal Medicine	<u>Diagnosis and Treatment of Patients with Endocrine and Urological Diseases</u> SCAM25021U	Diagnosis and Treatment of Patients with Endocrine and Urological Diseases SCAM25021E	1	Diagnosis and Treatment of Patients with Endocrine and Urological Diseases SCAM25022E	5
Companion Animal Internal Medicine	<u>Diagnosis and Treatment of Patients with Gastrointestinal and Respiratory Diseases</u> SCAM25023U	Diagnosis and Treatment of Patients with Gastrointestinal and Respiratory Diseases SCAM25023E	1	Diagnosis and Treatment of Patients with Gastrointestinal and Respiratory Diseases SCAM25024E	5
Companion Animal Internal Medicine	<u>Diagnosis and Treatment of Patients with Haematological, Infectious and Critical Medical Diseases</u> SCAM25025U	Diagnosis and Treatment of Patients with Haematological, Infectious and Critical Medical Diseases SCAM25025E	1	Diagnosis and Treatment of Patients with Haematological, Infectious and Critical Medical Diseases SCAM25026E	5

Outline of Master's Project

Course title and code	Exam title and code	ECTS
<u>Master's Project</u> <u>SCAM24001U</u>	Master's Project SCAM13025E	12

6.2 The student must pass all compulsory courses before commencing on the elective courses.

6.3 The student must have completed all compulsory and elective courses and passed all exams before the master's project oral exam.

6.4 The sequence of the compulsory courses and the elective courses can be changed, unless otherwise stated in the course curriculum. Changes in the sequence of the courses are always handled individually and must always be approved by the Study Board.

6.5 The Study Board may grant exemptions from the provisions 6.2 by exceptional circumstances.

6.6 The course descriptions at <https://kurser.ku.dk/> specify learning outcomes, contents, teaching and learning methods, prerequisites for participation, etc.

§ 7 Compulsory, constituent subject elements and elective elements

The programme consists of 42 ECTS credits from compulsory study and exam activities of which the master's project is worth 12 ECTS credits.

7.2 The programme consists of 18 ECTS credits from elective study and exam activities.

7.3 The programme's constituent subject elements are:

- All compulsory study and examination activities
- The master's thesis
- Elective subjects

§ 8 Group exams

Written papers can be done in groups with other students if stipulated in the course descriptions at www.kurser.ku.dk

8.2 Group examinations can be done for groups of no more than four students, when stipulated in the course descriptions at www.kurser.ku.dk

8.3 Jointly written papers are permitted provided the contributions made by each member of the group can be identified. A separate and individual grade will be given to each student.

8.4 Oral examination on the basis of jointly written papers should be individual, and a student may only attend the examination of other students in the group if his or her examination has been held.

§ 9 Instruction and exam languages

Instruction is conducted in English, unless only Danish-speaking students and instructors are present.

9.2 All examinations are conducted in English. When specified in the course descriptions at [www.kurser.ku.dk](https://kurser.ku.dk) a student can choose to conduct an examination in Danish.

9.3 The master's project can be written in English or Danish.

§ 10 Elective elements

The master programme includes a compulsory element of elective courses worth a total of 18 ECTS credits.

10.2 The Study Board must ensure that master students have access to elective courses. These elective courses are described in the course descriptions at <https://kurser.ku.dk/> and announced no later than 1 May and 1 November in the preceding semester.

10.3 In February the Study Board generally approves the elective course descriptions for the following academic year.

10.4 The Study Board offers elective courses that are aligned with the objective of the master programme, see 1.1 on objectives above.

10.5 The elective courses consist of a chosen specialization track with 3 courses worth a total of 18 ECTS. All courses within the chosen specialization track must be followed.

§ 11 Master's project

The program concludes with a master's project, as stipulated in § 11, paragraph 1, no. 2 of the master's regulation. The student must have completed and passed all courses and examinations in the program before the oral defense of the master's project; otherwise, the student will be deregistered. The project must demonstrate the student's ability to formulate, analyze, and process issues within a relevant, delimited scientific subject in a qualified manner.

2. The master's project is prepared individually or in groups of up to four students.

3. The project must adhere to length guidelines specified in the course description for the master's project and fall within the topic of the approved master's project agreement.

4. The project must include a summary in English, not exceeding 1 A4 page. The summary contributes to the overall assessment of the project.

5. In assessing the master's project, emphasis is placed not only on the academic content but also on the student's spelling and writing skills. Academic content is given the greatest weight.

6. The master's project is worth 12 ECTS points.

7. The master's project can be written in Danish, Norwegian, Swedish, or English; this also applies to the oral defense.

Part 4 Specific provisions

§ 12 Transitional arrangements

Please find transitional arrangements [here](#)

§ 13 Prerequisites for establishing courses

In the event that a course attracts fewer than the number of students stipulated in the course descriptions at <https://kurser.ku.dk/>, The Faculty of Health and Medical Sciences reserves the right to cancel the course. However, if the course is sought after by students admitted at the master programme the faculty is obligated to run obligatory courses at least every second year.

Part 5 Concluding remarks

§ 14 Exemptions from these provisions

By exceptional circumstances, the Study Board may grant exemptions from any curriculum provisions within the sole remit of the Study Board.

§ 15 Date of commencement

This revised curriculum comes into force on 1 September 2025 and shall apply in relation to all students admitted at the programme.
