Profile
The programme allows you to choose from one of three specialisations connected to the various phases of the drug development process: Drug Discovery, Drug Development and Medicines and Society.

Key features:
- Choice of one of three specialisations
- Wide range of electives and choice of thesis topic allow you to create a highly specialised or broader programme that matches your interests
- Close cooperation with industry
- Research-based training at the highest academic level
- Interdisciplinary approach
- A fully international programme that prepares you for an internationally oriented career
- Varied teaching methods and project work

Structure and teaching methods
All teaching is research based and methods vary, combining lectures, classroom teaching, hands-on laboratory exercises and report, article and poster preparation. Group projects are common. Focus is on an active problem-solving approach that prepares students for the job market.

Career opportunities
Graduates in the pharmaceutical sciences are in heavy demand in the pharmaceutical industry internationally and in the Danish biotech, medico-tech and pharmaceutical industries, which hold a key position in the international arena. The location of the Faculty of Health and Medical Sciences, School of Pharmaceutical Sciences and its cooperation with industry provide excellent opportunities for students to build contacts to future employers already while they are studying.
**Admission criteria**

To apply for the MSc programme in Pharmaceutical Sciences you must have completed a BSc with a solid background in chemistry and biology. You must have earned your Bachelor's degree a maximum of five years before the first semester of the Master's programme begins.

Applications must include a letter of motivation. An overall assessment is made on the basis of academic qualifications, including, in addition to grades, the relevance of the subjects studied, experience of experimental work and international experience. See also “Find out more”.

Non-EU students are required to pay tuition fees. Current tuition fees (subject to change) for non-EU students per academic year: DKK 108,000 (approx. EUR 14,400).

Language requirements: IELTS 6.5; TOEFL 560 (paper) or 83 (Internet-based)

**Application deadlines**

15 January: non-EU/EEA citizens
1 March: EU/EEA and Swiss citizens

The introduction programme starts at the end of August.
